

GRP HANDRAIL SYSTEM

Product Overview

Ezi Klamp Systems are pleased to introduce an innovative range of handrail systems. The GRP tubes and fittings featured in this section are made of premium-quality glass reinforced plastic, an innovative material that has proven to have many advantages over the traditional galvanised steel used in standard handrail systems.

Advantages

- Corrosion & Chemical Resistant
- High Strength-To-Weight Ratio
- Large stocks for prompt delivery
- Non-Conductive
- Non-Magnetic
- Fire Retardant

Application

- Railway trackside applications
- Access platform walkways
- Worker access to machinery
- Manufacturing plants
- Marine vessel applications
- Water treatment works
- Offshore wind & oil facilities
