

Product Overview

Strong pedestrian guardrails are a requirement in many industrial and roadside settings. Guardrail equipment can help make your premises safer and are a must in areas where the visibility and safety of users is of critical importance. Pedestrian guardrails can be used on walkways, paths, bridges, and in many other outdoor areas.

Advantages

- Fully comply with BS7818:1995 quality standards (pedestrian restraint systems in metal).
- Supplied in a galvanised finish to BS1461:1999.
- Easily customised with a polyester powder-coated finish to any standard RAL colour.

Application

- Industrial
- Roadside Settings
- Walkways
- Paths
- Bridges
- Outdoor Areas
