## DDA HANDRAIL SYSTEM

**The EZI KLAMP DDA Handrail System has been used extensively by local authorities, builders and contractors for over three years.**

This system enables contractors and specifiers to satisfy the requirements of the **Disability Discrimination Act (DDA)** and **Building Regulations Part M: 2006** for access to public and commercial buildings.

Under the terms of the DDA, all public and commercial building owners have to provide non-discriminatory handrails and balustrades on stairways and ramps.

The new **DDA Handrail System** is specifically designed to give a **smooth, continuous, offset handrail** with a diameter of 48mm. When Polyester Powder-Coated this meets the visibility and "not cold to the touch" requirements of the DDA.

**EZI KLAMP** offers a complete service from site survey through to final installation; alternatively this system can be supplied in kit form with full fitting instructions, delivered direct to site.

Prompt quotations can be supplied from your drawings and specifications.

**Call our sales office on 0117 970 2420 to discuss your requirements. Alternatively, email your enquiry to: [sales@eziklampsystems.com](mailto:sales@eziklampsystems.com)**

### THE ADVANTAGES:

- ⊕ **Satisfies DDA requirements**
- ⊕ **Smooth, continuous offset handrails – no raised fittings**
- ⊕ **User friendly and "not cold to touch"**
- ⊕ **Available as a complete installed product or in kit form**
