

Product Overview

The Ezi Klamp DDA Handrail System is used extensively by local authorities, builders and contractors nationwide. This system enables contractors and specifiers to satisfy the requirements of the Disability Discrimination Act (DDA) and Building Regulations Part M: 2006 for access to public and commercial buildings. This system can be supplied in kit-form, delivered to site with full installation instructions; alternatively we can offer a site survey and installation service.

Advantages

- User friendly and 'not-cold-to-touch'.
- Available as a complete installed product or in kit-form.
- Smooth, continuous offset handrails with a diameter of 48mm and no raised fittings.
- Satisfies DDA requirements, all public and commercial building owners have to provide nondiscriminatory handrails and balustrades on stairways and ramps.
- Available in any standard RAL Colour.

Application

- Wide range of applications including access to public and commercial buildings.
